

Criminal & Terrorist  
Attack Resistant  
Doors & Shutters

[rhinodoors.com](http://rhinodoors.com)

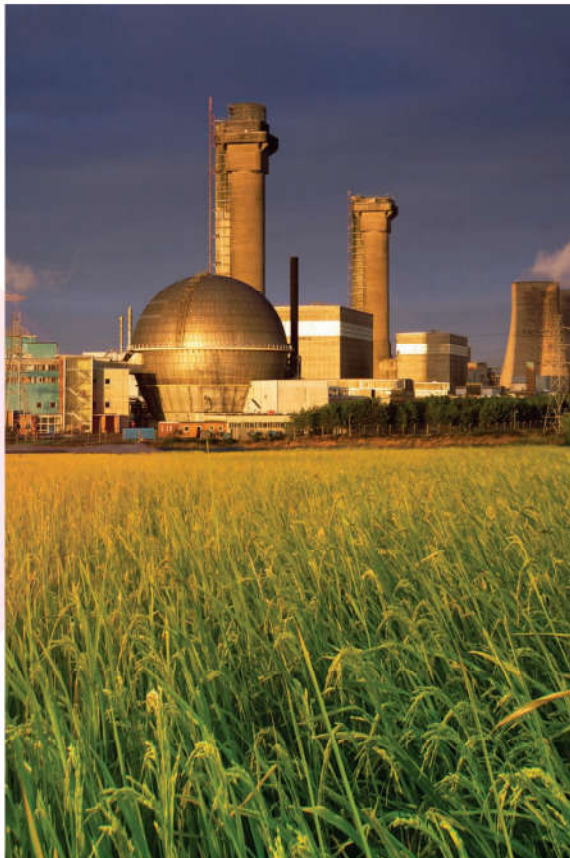

'A portfolio company of Cyrus Investment Management LLP'

Established in 1983 in the heart of the South Wales steel industry we design, manufacture, install and maintain a range of high security steel doors.

Our UK Government Attack Delay Standard and commercial security rated products are designed to withstand sustained and deliberate physical attack:

- Sliding-folding doors
- Folding doors
- Sliding doors
- Hinged doors
- Roller shutters

A number of our products are also designed and tested to resist blast, ballistic and vehicle ram attack.

Rhino doors are extensively used for the protection of our national infrastructure. Our long-standing repeat customer base includes companies operating in the following sectors:

#### **Ministry of Defence**

- Military bases, armouries and vehicle storage areas
- Other sensitive installations

#### **Utility Providers**

- Water treatment facilities
- Electrical generation infrastructure
- Operating civil nuclear reactors
- National Grid

#### **Nuclear**

- Operating civil nuclear reactors
- Decommissioned reactors
- Experimental reactor sites
- New build

#### **Financial & Postal Services**

- Bank of England
- Royal Mail
- Cash handling depots

LPS1175 Rated Hinged Doors

LPS1175 single and double leaf doors are available with optional fire ratings, insulated cores, over panels, single and multi-point locking and panic escape systems.

This door is also available with pad locks with internal override ensuring no entrapment risk for personnel inside the building.

We are a long established niche manufacturer of UK Government physical attack delay standard sliding-folding and hinged doors with optional ballistic, blast and vehicle ram resistance.

We provide free advice and site surveys and a comprehensive after-sales service, with 24-hour emergency call-out and planned maintenance contracts backed by extended warranties.

Our doors are installed and maintained by our own health & safety trained, and security cleared staff operating from fully equipped vans.

We are experts in the design and manufacture of control systems.

We are a NIC EIC Approved contractor.
